

- A** The total width of the timber. The posts are 150mm wide
- B** The total depth of the timber from the house wall
- C** The side height. Typically customers finish this measurement around the door frame height
- D** The total timber height required on top of your walls. Remember to allow at least 150mm above this for ridge tiles and lead work
- E** Please note any specific required pitch. Our standard pitch is 45 degrees but this can be adjusted. If you do not know your pitch we can work it out from measurements A, C and D
